

## Blank Album Pages for Postmarks

This PDF file contains various layouts I have been using for my own postmark collection. I hope you will find them useful.

Each page is a different type of blank album page. Some pages have a row for each town, with 3, 4, 5, 6 or 7 rows per page. With these, I go through an old Hammond atlas and make a row for each town listed -- while not perfect, I find that this makes a good starting point for a postmark collection from any country. Afterwards, the smaller towns can be added as needed.

Later pages have a handy layout for slogan cancels, with columns for the earliest and latest usage found.

The last set of pages has one blank space per year, 30 years per page. I use these for major cities, and it's fun to fill in postmarks for each year. When a page like 1901-1930 fills up, just add a fresh blank page to handle the overflow.
